

Erratum

In the article **Variability of registration latency and amplitude of the auditory evoked potential long latency (P3) in the condition test and retest** (<http://dx.doi.org/10.1590/S2317-643120140003000014>) published in journal **Audiology – Communication Research**, **19(3):293-8**, page **295** which read:

“(...) *Tone Burst* was used as auditory stimulus in tones of 1000 Hz for (...), with 0.5-30 Hz bandpass filter, monoaural stimuli and stimulation rate of 1.1 stimulus/second, at 70 dB intensity NA (...)”

Read:

“(...) *Tone Burst* was used as auditory stimulus in tones of 1000 Hz for (...), with 0.5-30 Hz bandpass filter, binaural stimuli and stimulation rate of 1.1 stimulus/second, at 70 dB intensity NA (...)”
