

En el artículo **LOS DESAFÍOS DEL ANTROPOCENO: DE LA POLÍTICA AMBIENTAL INTERNACIONAL HACIA LA GOBERNANZA GLOBAL**, con el número DOI <http://dx.doi.org/10.1590/1809-4422asoc214v2022017>, publicado en el Revista Ambiente & Sociedade, vol. 20.3: 177 - 202, en las páginas 180 y 183, desestime el siguiente extracto:

abrupt environmental change within continental- to planetary-scale systems. We have identified nine planetary boundaries and, drawing upon current scientific understanding, we propose quantifications for seven of them. These seven are climate change (CO₂ concentration in the atmosphere).
