Neotropical Entomology 35(6):871 (2006)*Navia*, um Nome Genérico Substituto para *Euterpia* Navia & Flechtmann (Prostigmata: Eriophyoidea: Eriophyidae)RESUMO - *Navia* **nom. nov.** é proposto para substituir *Euterpia* Navia & Flechtmann, 2005 (Prostigmata: Eriophyoidea), pré-ocupado por *Euterpia* Bondar, 1942 (Insecta: Coleoptera: Curculionidae).

PALAVRAS-CHAVE: Insecta, Coleoptera, Phyllocoptini, Phyllocoptinae, nome novo, homonímia

ABSTRACT - *Navia* **nom. nov.** is proposed for *Euterpia* Navia & Flechtmann, 2005 (Prostigmata: Eriophyoidea), preoccupied by *Euterpia* Bondar, 1942 (Insecta: Coleoptera: Curculionidae).

KEY WORDS: Coleoptera, Insecta, Phyllocoptini, Phyllocoptinae, new name, homonymy

Navia **nom. nov.***Euterpia* Navia & Flechtmann, 2005 [type-species: *Euterpia fissa* Navia & Flechtmann, 2005, by original designation (Navia & Flechtmann 2005: 42)], **nec** *Euterpia* Bondar, 1942 [(type-species: *Euterpia rufa* Bondar, 1942, by original designation (Bondar 1942: 25)].Navia & Flechtmann (2005) described the genus *Euterpia* (Prostigmata: Eriophyoidea: Eriophyidae: Phyllocoptinae: Phyllocoptini) for one species (*E. fissa* Navia & Flechtmann 2005) of Neotropical Eriophyoid mites.However, this name is preoccupied by *Euterpia* Bondar, 1942, a genus of Curculionidae (Insecta: Coleoptera). Guenée (in Boisduval & Guenée 1852) had already used *Euterpia* in 1852 as a *lapsus calami* for *Euterpia* Guenée, 1850 (Lepidoptera: Ditrysia: Noctuoidea: Noctuidae: Hadeninae). Therefore, *Navia* **nom. nov.** is here proposed to replace *Euterpia* Navia & Flechtmann 2005. The nominal genus is in honor to the acarologist Denise Navia. As a result,the following new combination is introduced: *Navia fissa* (Navia & Flechtmann, 2005) **comb. nov.**
