Appendix S6 – PCA with Calomys tener and C. expulsus

First PCA using only the samples with the identified species, Calomys tener and C. expulsus, in the two major axis (PC1 29.5%, PC2 13.8% of the variance). This PCA showed the same pattern as that of the second PCA demonstrated in this study. Legend: Black circles – C. expulsus; Gray triangle – C. tener. See text for discussion.
