“Arquivos de Neuro-Psiquiatria” has come into being under the guidance of Dr. Oswaldo Lange, whose efforts and perseverance have been instrumental in surmounting the countless initial obstacles that cause difficulties in achieving an objective of this nature [...]

Delay in publishing studies, or their publication in specialist journals, unquestionably represents a serious inconvenience [...] In our capacity of holding direct responsibility for the study centers that have resulted from the seedlings planted by Enjolras Vampré, we decided to combine our efforts and those of our assistants in order to add prestige in all senses to this new publication [...] It therefore gives us great satisfaction to see the first issue appearing, considering that we welcomed and encouraged the original idea from the time of its earliest stages [...].

With such great and determined support, [...], “Arquivos de Neuro-Psiquiatria” will certainly succeed in making its mark alongside similar journals within this specialty.
