

Errata I - Republicamos abaixo, de forma correta, as Figuras 1 e 2 relativas ao artigo "Acid-base disarrangement and gastric intramucosal acidosis predict outcome from major trauma", publicado na Rev Assoc Med Bras 2008; 54(2): 116-21.

Figure 1 - Time course of arterial bicarbonate (HCO_3); arterial base-excess (BE); and arterial lactate in survivors (triangles) and nonsurvivors (circles). Values are mean \pm SD. *p<0.05 significant differences between the two groups. #p<0.01 vs. admission

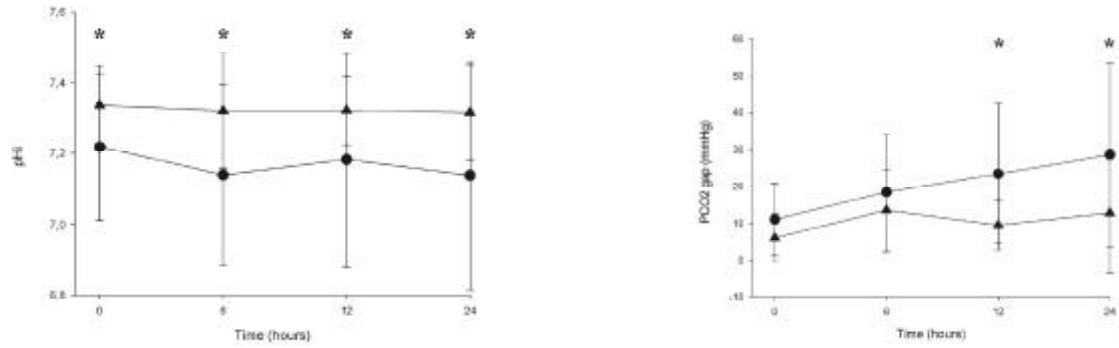

Figure 2 - Time course of intramucosal pH, and PCO_2 gradient in survivors (triangles) and nonsurvivors (circles). Values are mean \pm SD. *p<0.05 significant differences between the two groups. #p<0.01 vs. admission
