

Luz TCB, Loyola Filho AI, Lima-Costa MF. Perceptions of social capital and cost-related non-adherence to medication among the elderly. Cad Saúde Pública 2011; 27(2):269-276.

A revista foi informada sobre a não inclusão da Tabela 4 no artigo. A Tabela 4 correta é:
The journal has been informed that Table 4 was not included in the article. The correct Table 4 is:

Table 4

Statistically significant results for the multivariate analysis of factors associated with cost-related medication non-adherence. Greater Metropolitan Region of Belo Horizonte, Minas Gerais State, Brazil, 2003.

Characteristics	PR (95%CI)
Perception of attachment to the neighbourhood	
Low	Reference
High	0.66 (0.48-0.92)
Self-rated health	
Excellent/Good	Reference
Fair	1.70 (0.96-2.97)
Poor/Very poor	2.53 (1.41-4.57)
Number of self-reported chronic diseases	
None	Reference
1	2.33 (0.92-5.92)
2	3.29 (1.32-8.21)
3+	4.32 (1.72-10.86)
Private health insurance coverage	
No	Reference
Yes	0.64 (0.44-0.92)
Frequency of physician-patient dialogue about health/treatment	
Always/Most of the time	Reference
Rarely/Never	1.87 (1.15-3.03)

PR (95%CI): prevalence ratio (95% confidence interval) estimated by Poisson regression and adjusted for all the variables listed in the column (individuals who did not report cost-related medication non-adherence were the reference group).
