Errata

In the article “Is the fistula first approach still valid?”, with DOI code number <https://doi.org/10.1590/2175-8239-JBN-2020-U001>, published at Brazilian Journal of Nephrology, 2021;43(2):263-268:

Where it was written:

Page 264:

Countless papers on vascular access for hemodialysis started with some variation of the phrase “The arteriovenous fistula (AVF) is the gold standard access for hemodialysis, **due to due to** its lower rate of complications and mortality compared to arteriovenous grafts (AVGs) and catheters”.

The increase in the creation of AVFs has shown a rate of **primary of maturation** failures from 23% to 46%, with a great need for interventions to reach maturity.1–5

Page 265 (Table 2):

Distal antes de proximal.

FAV antes de EAV.

HD: hemodiálise, TFG: taxa de filtração glomerular, FAV Fístula arteriovenosa, EAV Enxerto arteriovenoso, DP: diálise peritoneal.

Should read:
