

■ In the scientific article “**Amniotic membrane transplantation in ocular surface diseases**” by the authors Nayara Teixeira Flügel, Bruna Girardi, Daniel Wasilewski, published in issue number 6 - volume 79 of the Revista Brasileira de Oftalmologia, November-December 2020, pages 374-379, with DOI 10.5935/0034-7280.20200082. There is an error on page 376, in table 1 - Demographic characteristics, affected eye, diagnosis and corrected visual acuity (CVA) pre-and postoperatively in the column - Postoperative CVA (column 6), with line 13, Stevens-Johnson syndrome. Where it read: 20/20. Read: 20/20 in the bottom row in the same column also 20/20. Thus excluding the 20/20 data below (line 13) Stevens-Johnson syndrome. Still in the same scientific article “**Amniotic membrane transplantation in ocular surface diseases**” on page 377, there was an exchange of the images in figures 1 A and 2 A, the captions are correct, changing only the order of the images.

Table 1
Demographic characteristics, affected eye, diagnosis and corrected visual acuity (CVA) pre-and postoperatively

Diagnosis	Age (years)	Sex	Affected eye	Preoperative CVA	Postoperative CVA
Alkali burn (Figures 1A, B)	45	Female	Right	-----	20/30
Alkali burn	12	Male	Left	-----	Hand Motion
Alkali burn	28	Male	Right	20/120	20/25
Alkali burn (Figures 2A,B)	44	Male	Right	Hand Motion	20/400
Alkali burn	39	Male	Left	Hand Motion	CountingFingers
Thermal burn	14	Female	Right	-----	20/125
Shield ulcer	11	Male	Right	20/50	20/40
Shield ulcer	13	Male	Left	-----	20/50
Shield ulcer	12	Male	Right	20/100	20/30
Perforated ulcer	82	Male	Right	-----	20/100
Stevens-Johnson syndrome	28	Female	Both	-----	20/20 20/20
Bullous keratopathy	47	Female	Right	Counting Fingers	CountingFingers
Neurotrophic keratopathy	21	Female	Right	20/60	20/60
Neurotrophic keratopathy	34	Male	Right	Hand Motion	Hand Motion
Grade 4 recurrent pterygium (Figures 3A,B)	41	Male	Right	20/40	20/30
Grade 4 recurrent pterygium	39	Male	Both	20/50	20/25
in right eye and grade 3 in left eye				20/25	20/25
Grade 3 recurrent pterygium	37	Female	Left	20/160	20/50
Epidermolysis bullosa	54	Male	Left	Counting Fingers	CountingFingers
Ocular cicatricial pemphigoid	60	Male	Left	Hand Motion	Hand Motion
Symblepharon after excision of epidermoid carcinoma (Figures 4A, B)	72	Male	Right	Hand Motion	CountingFingers
Limbal deficiency	54	Female	Right	Counting Fingers	CountingFingers

Figure 1A: Alkali burn (preoperative period)

Figure 1B: Alkali burn (postoperative period – 11 months)
