

Corrigendum

<http://dx.doi.org/10.1590/1516-4446-2020-0025>

We regret to inform that an editing error passed unnoticed in the article titled “Brazilian Psychiatric Association guidelines for the management of suicidal behavior. Part 2. Screening, intervention, and prevention” (<http://dx.doi.org/10.1590/1516-4446-2020-1108>), by Leonardo Baldaçara et al., published in the *Brazilian Journal of Psychiatry* in December 2020 in ahead of print mode. The error appears in Box 2, second column, in the form of question marks within square brackets that should have been removed. Also, we changed “mental health symptoms” to “mental disorder symptoms.” Below we reproduce the revised, correct version of Box 2:

Box 2 Postvention: what to do

Intervention	Warning
Psychotherapy	More intense grief experience or mental disorder symptoms
School intervention	
Online support forum	Referral for treatment
Residential treatment program
